How to Register Items

A guide on how to sign up and register item(s) with My Property.

01

Company Overview

Tranverse is a leading information and communication technology (ICT) company that provides innovative solutions for businesses and organizations of all sizes. Founded in 2020, the company has a team of experienced professionals dedicated to delivering the highest quality services and products.

We are committed to delivering cutting-edge technology solutions that meet our clients' ever-evolving needs. Our solutions are designed to increase efficiency, enhance productivity, and improve business outcomes. Our offerings include cloud computing, cyber security, database management, and IT consulting services.

With a focus on customer satisfaction, our team of experts works closely with clients to understand their unique needs and requirements. We provide comprehensive solutions that are tailored to meet the specific needs of each client, whether it is a small business or a large corporation.

Our solutions are backed by industry-leading technology and robust infrastructure, ensuring that clients receive the best possible services. Our team of experts is available 24/7 to provide technical support and help with any issues that may arise.

At Tranverse, we are dedicated to delivering the highest quality services and solutions. Our goal is to help businesses; organizations, government and other individuals achieve their full potential and solve problems through the use of technology. Whether you need a complete IT solution or just a single service, we have the expertise and experience to help.

We are proud of the long-standing relationships we have built with our clients, and we are committed to providing the best possible experience for everyone we work with. If you're looking for an ICT company that is dedicated to delivering exceptional service, look no further than Tranverse.

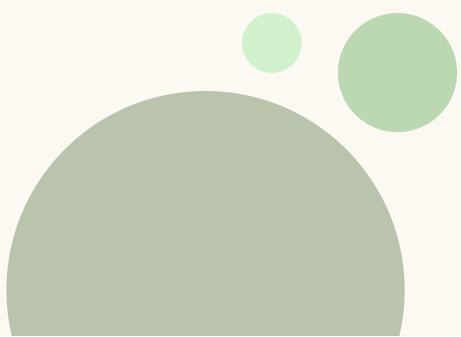

Our Vision

Our vision is to revolutionize the way the world communicates and operates through innovative and cutting-edge information and communication technology solutions. We strive to empower businesses and individuals with seamless, secure, and efficient technology that enhances their productivity, enables collaboration, and drives growth. Our goal is to be at the forefront of the ICT industry, constantly pushing boundaries and creating new and improved technology that meets the evolving needs of our clients and the market. We are committed to providing exceptional service, fostering a dynamic and inclusive workplace, and contributing to the betterment of society through the use of technology.

Our Mission

Our mission at Transverse is to revolutionize the way businesses and individuals utilize technology to drive success. We aim to provide innovative and effective ICT solutions that enable our clients to streamline their operations, increase efficiency, and stay ahead of the curve in a rapidly changing technological landscape. Our goal is to become the trusted partner for businesses seeking to leverage technology for growth, success, and competitive advantage. With a focus on quality, customer satisfaction, and continuous improvement, we are dedicated to delivering exceptional value to our clients every day

Our Core Values

INTEGRITY

We recognize that our business has a significant impact on the lives of individuals, organizations, and communities, and we take this responsibility seriously. This means we always act with integrity, even when no one is watching. We put the needs of our customers and your greater good ahead of our interests. Our commitment to integrity as a core value helps us maintain a positive reputation and build long-lasting relationships with our customers and partners.

DILIGENCE

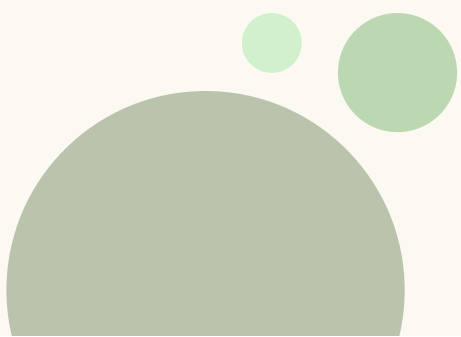

We are thorough in carrying out our assignments. We assemble the best of human resources in the planning and execution of projects to guarantee our clients enduring results with high effectiveness.

EXCELLENCE

We believe that excellence is not just a goal, but a continuous journey. It drives us to push boundaries, be innovative, and provide top-notch solutions to our clients and stakeholders. We are committed to delivering excellence in every project we undertake, and this is reflected in our processes, systems, and the way we treat our operators, partners, and clients.

RESPECT

We maintain a sense of self-respect, discipline, responsibility, and institutional loyalty. Respect is demonstrated in the way we communicate with each other. It requires us to listen actively and respond professionally and courteously, avoiding harmful language or behavior.

02

About My Property

MY PROPERTY is an innovative solution for managing item details, powered by web and mobile (app) technology. It stands out from other information management systems due to its user-friendly interface and ability to swiftly store and retrieve data. Thus, this platform is perfect for a modern and future-proof solution for item information management on a local or international level.

MY PROPERTY is composed of various dynamic web pages and mobile app features with varying levels of access and security. This system manages public and private items or property information, all while ensuring maximum security for sensitive information. The purposeful design of the web and mobile app technology used for MY PROPERTY guards against modification, disruption, destruction, and unauthorized copying of corporate, individual, or government data.

The purpose of MY PROPERTY is to effortlessly monitor information on any item, including Mobile Phones, Tablets, Laptops, and Vehicles. This way, we can work towards preventing illegal items from ending up with individuals or companies unknowingly. It happens daily that these stolen items are purchased without being able to verify their authenticity; our system helps put a stop to this by providing an easy-to-use web-based and mobile (app) based checking system.

MY PROPERTY creates a platform for individuals and companies to verify the authenticity of any Mobile Phones, Vehicles, and Other Items before buying so as not to fall victim to the circumstances of buying a stolen item. The verification of items comes from the pre-registration of such items which forms the most important part of the system.

03 How My Property Works

MY PROPERTY aims to simplify and automate the process of Item Information Management globally and below is how it functions.

i. INFORMATION STORAGE

Individuals can sign up to get an Individual account and can store their item(s) information through the front end which will be verified by My Property Verification Agents. Upon registering, an individual's information (such as name, address, and identification) is saved and linked to a unique phone number for easy retrieval. This information will be securely stored and used to register electronic items under their name. To help ensure authenticity, various precautionary measures are in place to prevent fraudulent or duplicated records.

ii. INFORMATION VERIFICATION

Information about an item can be authenticated using its unique identifying number or the phone number of its owner. Those with limited access can only view a small amount of data, but those with higher clearance may be able to acquire more detailed information. Verification is typically done by individuals, operators, administrators, and users with greater authority.

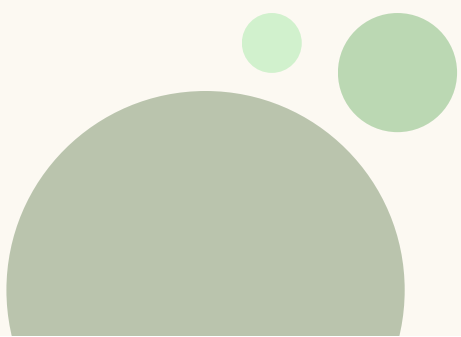

iii. REPORTING A STOLEN ITEM

People with higher privileges, including operators and individuals, can report a stolen item by providing the item's special ID or phone number. The admin will then review the report thoroughly before finally giving it approval. Afterward, the item's status is modified to "stolen" and made visible to everybody, allowing law enforcement officials greater chances of finding it.

MY PROPERTY is a comprehensive information management system, designed to combat the problem of individuals and organizations unknowingly purchasing stolen goods. It helps them keep a record of important assets such as mobile phones, tablets, laptops, vehicles, etc. This way they can guard against unfortunate incidents of theft and fraud.

MY PROPERTY has developed a platform that combines web and mobile technology to help users avoid the danger of buying stolen goods. The key to its success is pre-registering all items, which forms the base for its verification system.

04

Case Studies

Practical Case study 1 (Example):

Kunle went to a phone shop where a used phone is sold to him by the shop owner since he cannot afford a brand new phone just yet. With Kunle knowing about My PROPERTY and won't want to buy a stolen phone, he visits www.myproparty.com.ng to verify if it's a stolen phone or not. He saw the phone information status, showing **"Legit"** Kunle went ahead to negotiate with the phone seller and they agreed on a price. Kunle bought the phone. Kunle is safe, the seller is safe!

Practical Case Study 2 (Example):

John needs a car and shares his need for a car with Abu his friend. Abu told John that he knows someone who wants to sell a car and it was a distress sale. Abu made a call to the one who wants to sell a car and made the connection with his friend, John. All three of them met. John failed to visit www.myproparty.com.ng to check the status of the car. Six months later, John wanted to sell this same car to someone else. The person who wishes to buy this car from John visited www.myproparty.com.ng only to discover the status of the car is flagged **"Stolen"**. This has become a police matter as John, Abu and the first person who sold the car may go to jail. The original owner of the car having discovered MY PROPARTY went on www.myproparty.com.ng to register his car details which were taken from him at gunpoint 8 months ago.

05

How to register Items

**THIS PROCEDURE CAN ONLY BE DONE
BY ANYONE**

01

SIGN UP ON MY PROPERTY

An Individual can sign up on My Property. You can either do this on the website or by downloading the mobile app from either Play Store for android users or App Store for IOS. Following that, it's necessary to confirm your email address.

02

REGISTER THE ITEM

Once you have created your account, you can add any item to your dashboard. Our Verification Agents ensure that fraudulent information isn't saved in our My Property database by carefully examining every registration.

03

VERIFICATION OF ITEM

Once registration and approval have been completed, one can visit www.myproperty.com.ng/verify to confirm the item - simply choose the product and submit the unique identifier. Upon verification, a 'Legit' result will be provided.

04

REPORTING AN ITEM

Individuals can report registered items as stolen, which will cause their status to be changed from 'Legit' to 'Stolen'.

05

Voala! The item is protected and safe.

WEB DEVELOPMENT

Web design and development is an umbrella term that describes the process of creating a website. Like the name suggests, it involves two major skill sets: web design and web development. Web design determines the look and feel of a website, while web development determines how it functions.

DIGITAL MARKETING

Finding solutions to achieve outstanding success in competitive markets through leads and sales
